Severe Weather Outlook

Severe Weather Chances for Saturday

Weather Forecast Office

Lubbock, TX

Issued Jun 08, 2019 3:07 AM CDT

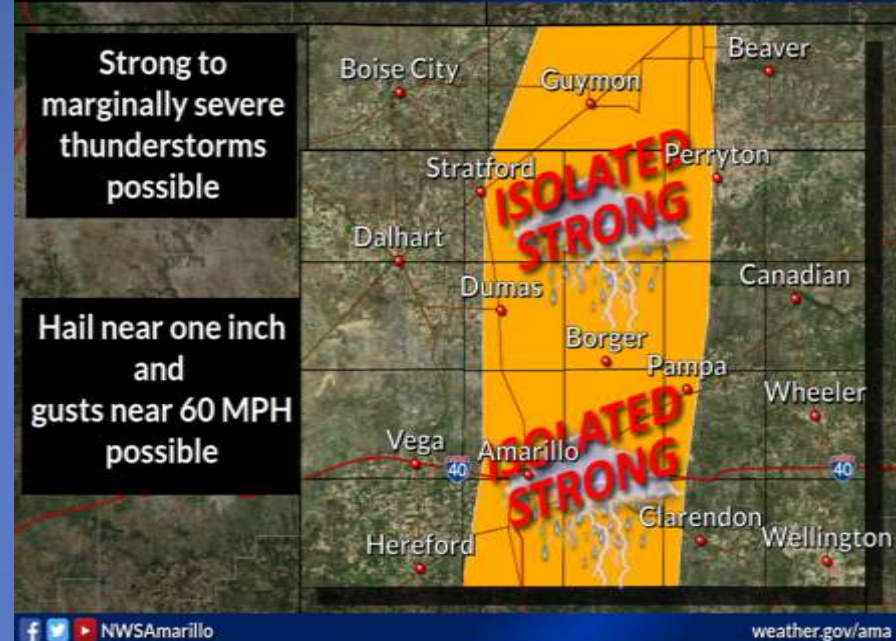

Isolated thunderstorms may form along a dryline in the South Plains this afternoon. Some of these storms may be able to produce severe wind gusts.

Late Afternoon & Evening Thunderstorms

Weather Forecast Office

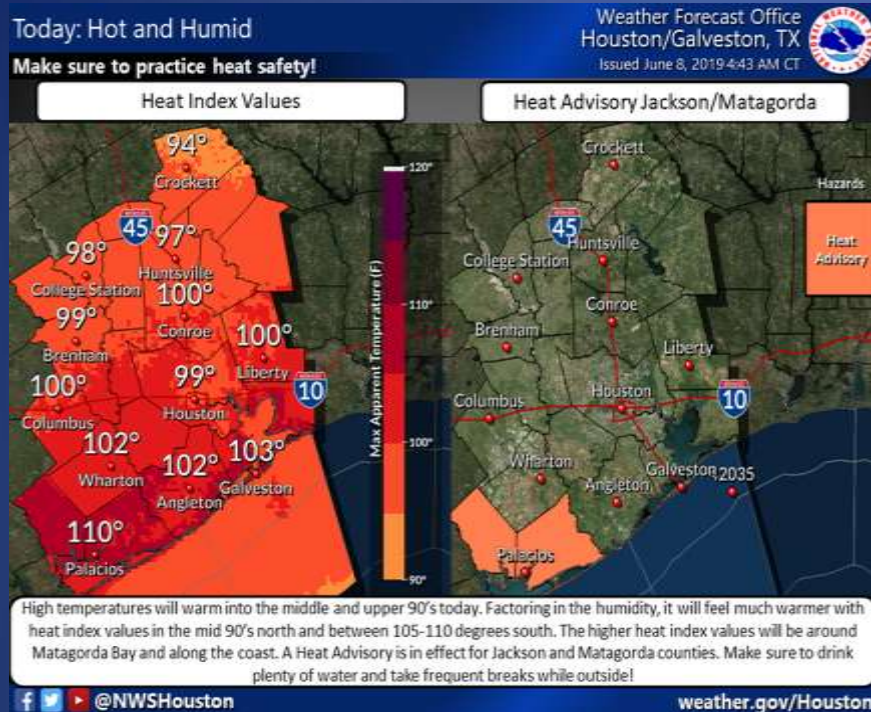

Amarillo, TX

Issued Jun 08, 2019 4:03 AM CDT

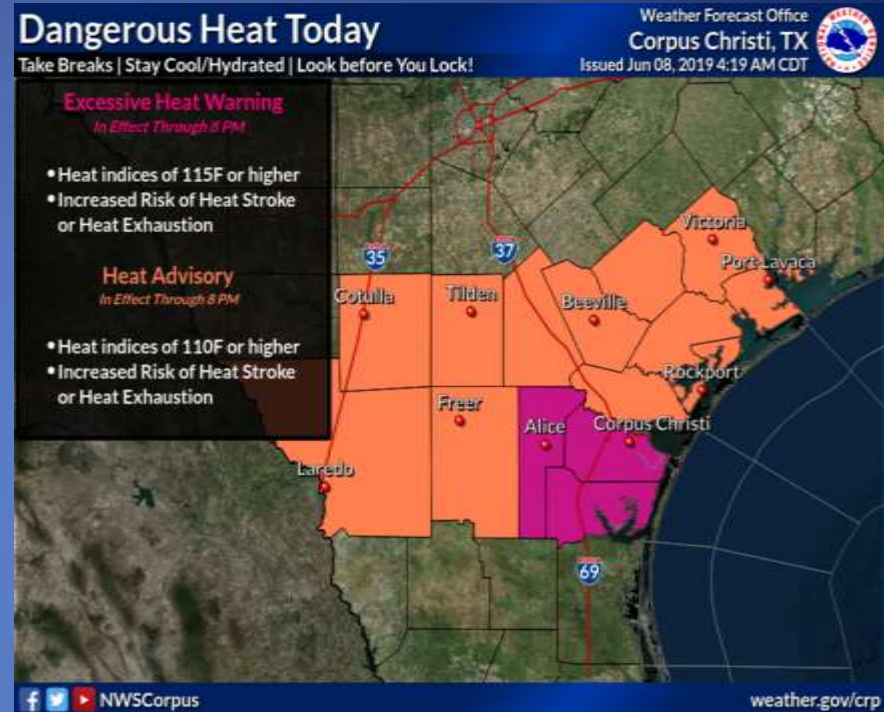

Isolated late afternoon and evening thunderstorms may develop today across central sections of the Panhandles. If updrafts are able to break through the cap, storms will have the potential to become strong to marginally severe, producing hail near one inch in diameter and gusts near 60 MPH.

Hazardous Weather

It will be very warm today and heat index values will be on the rise. Heat index is a measure of how it feels and the effects on your body. Drier air over the north will keep heat index values in the mid 90's but toward the coast and around Matagorda Bay, heat index values will range between 105-109 degrees. A Heat Advisory is in effect through 8 PM for Matagorda and Jackson counties.

LOOK BEFORE YOU LOCK! Dangerous heat conditions expected today. An Excessive Heat Warning is in effect for the southern Coastal Bend and a Heat Advisory is in effect for the remainder of South Texas through 8 PM this evening. Heat indices around 115 degrees can be expected across the southern Coastal Bend and around 110 degrees across the remainder of South Texas. Reduce, eliminate, or reschedule strenuous activities to the coolest times of the day. If you must be outside, reduce your activities, and take frequent breaks preferably in an air conditioned area. Wear lightweight, light-colored clothing. Drink plenty of non-alcoholic liquids, preferably water, even if you do not feel thirsty.

Hazardous Weather

The combination of hot temperatures and a moist atmosphere will once again create excessive heat conditions for a portion of Deep South Texas and the Rio Grande Valley today. Heat-related illnesses will occur for anyone working or playing outdoors for extended periods of time on Saturday. Be sure to drink plenty of water, take frequent breaks in the shade or air conditioned structures, wear loose fitting and light colored clothing, and NEVER leave pets or kids unattended in vehicles outside for any length of time. An Excessive Heat Warning and a Heat Advisory are both in effect from noon until 7 pm this evening.

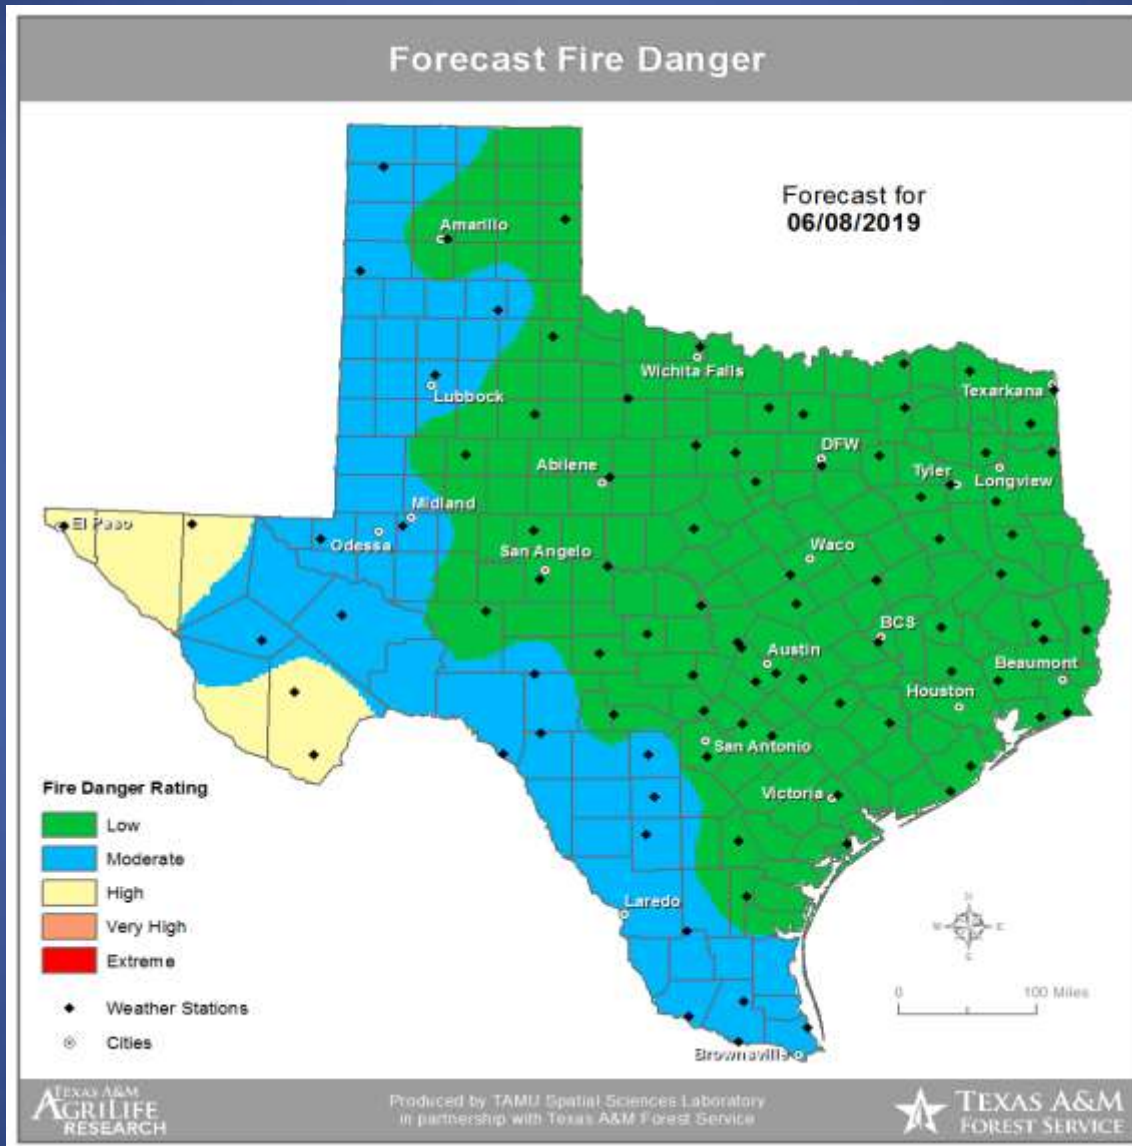

Today's main concern is the dangerous heat across the Rio Grande Valley this afternoon, which is expected to be even hotter than yesterday. High temperatures will reach the lower to upper 100s, but the heat index will range from 110 to 121 degrees Fahrenheit. As such, an Excessive Heat Warning and a Heat Advisory are in effect for this afternoon. Remember to practice heat safety: stay hydrated, limit your exposure outside during the afternoon hours, and look out for the elderly, the young, and pets. Mariners can expect the bay waters to be smooth this morning and to increase to a light chop this afternoon, with Gulf seas around 1 to 4 feet (0-60 nm).

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
06/07/19	Severe Thunderstorm Warning	Hidalgo, Kenedy and Willacy Counties
06/07/19	Excessive Heat Warning	Cameron, Kenedy and Willacy Counties
06/08/19	Excessive Heat Warning	Coastal Kleberg and Nueces Counties; Inland Cameron, Kenedy, Kleberg, Nueces and Willacy Counties; Northern and Southern Hidalgo County; Brooks and Jim Wells Counties
